JOÃO VICTOR HERMOGENES FERNANDES E SILVA

FULL STACK SOFTWARE DEVELOPER | REACT | PHP/LARAVEL | NODE.JS | ANGULAR | VUE.JS

joaovhfs@gmail.com | +55 (34) 9 9172-7865 | Brazil

PROFESSIONAL SUMMARY

Software Developer with approximately 7 years of experience developing and maintaining web systems, APIs, and internal solutions. Full-stack experience with React, PHP, Laravel, JavaScript, Node.js, Vue.js, Angular, jQuery, MySQL, and SQL. Experienced in web application development, frontend-backend-database integration, API testing with Postman, corrective and evolutionary maintenance, and technical support for junior developers. Additional experience supporting corporate platforms, Excel, and ArcGIS. Intermediate-to-advanced English and Spanish.

TECHNICAL SKILLS

Frontend: React, JavaScript, Angular, Vue.js, jQuery, HTML, CSS
Backend: PHP, Laravel, Node.js, REST APIs, MySQL, SQL
Tools & Practices: Postman, API testing, system integration, corrective and evolutionary maintenance, web application development, technical support, code review and developer guidance

PROFESSIONAL EXPERIENCE

Programmer (MEI) | Independent Projects | 2024–2025

- Developed complete web applications for business operations, integrating user interfaces, business logic, and data persistence.
- Worked with React to develop web interfaces and applications, applying full-stack experience to integrate frontend, backend, and data layers.
- Built and maintained digital platforms with a focus on stability, usability, and continuous improvement.

Programmer | Bravo Logísticas | 2023–2024

- Created and maintained internal system screens using Angular, Node.js, and SQL, supporting the evolution of the company’s operational workflows.
- Fixed and improved existing features, connecting frontend interfaces, backend services, and databases.
- Expanded technical skills through Alura learning tracks provided by the company and hands-on application in a corporate environment.

Developer / Administrative Assistant | Valmont | 2018–2023

- Transitioned from an administrative role into software development, taking responsibility for creating and maintaining systems using PHP, Laravel, JavaScript, jQuery, Vue.js, and MySQL.
- Developed and maintained APIs and performed functional and integration testing with Postman.
- Supported junior developer interns by helping them understand the system, resolve technical questions, and carry out development activities.

Assistant | Valmont | 2017–2018

- Supported activities involving ArcGIS, Excel spreadsheets, and the company’s internal platform, contributing to the organization and continuity of operational routines.
